🎓 EDUCATION

Management Information Systems

Anadolu University

10/2023 – Present

Computer Programming

Istanbul Gelisim University

10/2020 – 07/2023

Information Technology

Borusan Asım Kocabıyık Highschool

05/2016 – 08/2019

📄 SUMMARY

I turn complex ideas into clean, human-friendly products—most recently shipping the **fintech** platforms **D-Light** and **Bulletin** at Infina. With **4+ years** in frontend (Next.js & React Native), I also built the AI-driven travel app **Travexus** and the autonomous news site **newsinusa.com** 🌐. See more on GitHub or CV.

🧠 SKILLS

- React Native | Next.JS
- JavaScript | TypeScript
- Docker | Jenkins

📁 PROFESSIONAL EXPERIENCE

Infina Software | Innovation For Finance

Frontend Developer

08/2023 – Present

As part of the i-Suite team, I contributed as a **Frontend Developer** to several financial software projects using **Next.js**:

- **Bulletin** — Built pixel-perfect UIs for a platform that generates fund bulletins, performance, and activity reports with accurate, real-time data.
- **D-Light** — Developed frontend features for a web-based app integrated with Qlik Sense, enabling portfolio managers to track daily fund and cash movements effortlessly.
- **Contract-Web** — Frontend modules for centralized contract management.
- **i-Suite Website** — UI/UX contributions to the product site.

Additionally, I gained hands-on experience with **Docker**, **Jenkins**, and **CI/CD pipelines**, strengthening my understanding of modern development and deployment workflows.

SolvePark

React Native Developer

03/2023 – 06/2023

- Built features across multiple apps (Sportvy, Derin Enerji, Arktiwity, Astrodiossa): messaging, story upload, Tinder-style matching.
- Supported initial deployments to **Google Play** and the **App Store**.

Kroppa Digital Agency

Frontend Developer - Traniee

05/2022 – 10/2022

- Added voice-article feature to **Fırıncı Kazansın** mobile app.
- Fixed **TypeScript** issues in **Koç Finans** mobile app.
- Implemented **Formik**-based validations in the Koç Finans web project.

PROJECTS

Travexus

AI-powered Travel App

A cross-platform mobile application that combines travel and exploration with artificial intelligence.

- Features include photo-based discovery of landmarks/artworks, personalized trip planning, smart assistant recommendations, and multi-language support (EN & TR).
- Integrated Google/Apple login and subscription-based plans with a user-friendly UI/UX.
- App Store: Link [↗](#)
- Google Play: Link [↗](#)

Newsinusa.com [↗](#)

Autonomous News Platform

A web application that continuously scrapes U.S. news and publishes **AI-generated, original articles** automatically.

- Built with Spring Boot (backend) and a custom frontend integrated via REST APIs.
- Enhanced with an AI-driven podcast feature that generates audio content for trending news.
- Runs fully automated, from data collection to publishing, with no manual intervention.
